PRANET PATEL

647-507-7308 | p2patel252@gmail.com | linkedin.com/in/pranet-patel | pranetpatel.vercel.app

Engineering Science student at Western (Ivey AEO) who builds AI tools that find margin and cash problems inside small operating businesses. Shipped six production products at GENIE AI and co-run a digital agency generating $4K+ CAD monthly.

EXPERIENCE & PROJECTS

Leakfinder Nov 2026

AI diagnostic for small HVAC and plumbing businesses TypeScript · Next.js · Claude API · github.com/pranetpatel/leakfinder

- Reads a CSV of past jobs and ranks the biggest leaks with a dollar figure and confidence note: jobs priced below labour plus parts, technician price gaps, lapsed repeat customers, invoices unpaid 60+ days, and seasonality.
- Claude drafts a suggested fix for each finding. A person approves every draft, customer data stays in the browser, and a checker flags any number the model adds that was not in the source data.
- Tested on a 794-job synthetic dataset with planted problems; 22 automated tests confirm every planted leak is found.

Product Intern Apr 2026 – Sep 2026

GENIE AI / BOS, production products across the studio runbos.ai · ryzn.one · lingua.family

- Shipped six live products: BOS marketing (runbos.ai), Ryzn (ryzn.one), Lingua (lingua.family), Brass Tally (brasstally.com), BOS MBA (bosmba.com), and genieai.io.
- Built the business-facing systems behind them: org admin and mentor matching, bookkeeping with Plaid bank sync and AI receipt extraction, and an MBA application and learner portal with Postmark email.
- Owned production deploys and handoff docs (auth, env, migrations) so the team could run each product without me.

Co-Founder & Technical Lead Mar 2026 – Present

Ayvid Media, digital transformation agency generating $4K+ CAD monthly ayvidmedia.com

- Built a Next.js / React / TypeScript platform deployed on Vercel with Docker.
- Developed an AI quote system and live chat assistant using LLM integration and prompt engineering; AI-assisted development (Claude Code, Cursor) cut feature delivery time by about 40%.

AI Engineer Nov 2025 – Feb 2026

Nexa Technology Inc, AI-powered agricultural marketplace Greater Toronto Area, ON

- Built an AI pricing algorithm (~95% accuracy) and a customer chatbot (~90% satisfaction); defined data inputs, ML pipeline specs, and model architecture.

Swim Instructor & Deck Supervisor Feb 2024 – Present

Super Swims LTD., aquatics instruction and facility operations Brampton, ON

- Supervise a team of 8+ instructors: scheduling, safety compliance, and daily operations.
- Built OT-Notes (React Native / Expo / Supabase) to capture session notes and learning plans, saving supervisors ~15 min/hour.

Temple AI System & Golf Simulator Jul 2025 – Present

Technical projects Python · Flask · PyTorch · OpenCV · Docker

- Temple AI: Flask and React analytics app with ML program recommendations, QR check-in, and an on-device PyTorch model on Raspberry Pi; quantization cut inference time by ~30%.
- Golf simulator (in progress): built from scratch with dual high-speed cameras and OpenCV ball tracking (~85% vs range).

TECHNICAL SKILLS

AI & Data: LLM integration (Claude, OpenAI), prompt engineering, output validation, CSV and financial data analysis, PyTorch, OpenCV

Languages & Infrastructure: TypeScript, JavaScript, Python, Next.js, React, Node.js, Flask, Vercel, Supabase, PostgreSQL, MongoDB, Docker, Git/GitHub

Business Systems: margin and pricing analysis, accounts receivable, bank sync (Plaid), CRM and quote tools, transactional email (Postmark), admin consoles

EDUCATION & CERTIFICATIONS

University of Western Ontario, Bachelor of Engineering Science Sept 2025 – Present

Ivey AEO Scholar, Scholarship of Distinction · London, ON

Certifications: AWS Cloud Practitioner · Cisco Introduction to Cybersecurity · IBM AI Fundamentals · Onshape CAD Associate
