TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Next.js, React, Flask, REST APIs, Node.js

AI & ML: Prompt engineering, LLM integration (ChatGPT, Claude), PyTorch, ML pipeline development, AI chatbot development

AI Dev Tools: Claude Code, Cursor, GitHub Copilot, Vercel v0

Full Stack & DevOps: Docker, Git/GitHub, Vercel, PostgreSQL, MongoDB, Linux/Windows environments

Enterprise Systems: Business process automation, stakeholder communication, technical documentation

EXPERIENCE & PROJECTS

Co-Founder & Technical Lead

Mar 2026 – Present

Ayvid Media – Digital transformation agency delivering AI-powered web solutions

ayvidmedia.com

- Built Next.js/React platform with TypeScript, deploying full stack application on Vercel with Docker containerization
- Developed AI-powered quote system and live chat assistant using LLM integration and prompt engineering
- Leveraged Claude Code and Cursor for AI-assisted development, accelerating feature delivery by 40%
- Delivered UX overhaul with Tailwind CSS, mobile-responsive layouts, and conversion-optimized pages

AI Engineer

Nov 2025 – Feb 2026

Nexa Technology Inc – AI-powered agricultural marketplace platform

Greater Toronto Area, ON

- Designed and integrated AI-powered pricing algorithm and chatbot using Python and PyTorch
- Defined backend requirements including data inputs, ML pipeline specifications, and model architecture
- Authored training prompts and reference solutions, applying prompt engineering for optimal LLM performance
- Coordinated cross-functional implementation, managing stakeholder communication and system integration

Temple AI System

Jul 2025 – Nov 2025

Full-stack analytics platform with ML-powered recommendations

Python | Flask | React | Docker

- Built full stack web app using JavaScript/TypeScript frontend with Python Flask backend and real-time analytics
- Developed QR-based check-in system with secure JWT authentication
- Implemented on-device ML model using PyTorch, optimizing inference performance by 30% through quantization

Hardware Engineer

Sept 2025 – Present

Western Sunstang Solar Car Team – High Power subsystem

London, ON

- Validated CAN bus signals across powertrain subsystems, documenting architecture and data flows
- Reconfigured relay circuitry using EasyEDA and Altium, updating schematics and component specifications

Home Automation System

Nov 2023 – Jan 2024

Personal IoT project with integrated monitoring and control

Linux | Python | Docker

- Deployed Linux-based server with integrated dashboards and automation triggers for 15+ IoT devices
- Configured network infrastructure including DNS filtering, port forwarding, and secure remote access

Swim Instructor & Supervisor

Feb 2024 – Present

Super Swims LTD. – Aquatics instruction and facility operations

Brampton, ON

- Supervised team of 8+ instructors, managing scheduling, safety compliance, and daily operations
- Adapted communication and instruction strategies for neurodivergent students

EDUCATION

University of Western Ontario

Sept 2025 – Present

Bachelor of Engineering Science

London, ON

Ivey AEO Scholar, Scholarship of Distinction

CERTIFICATIONS

Cisco – Introduction to Cybersecurity | IBM – AI Fundamentals | Onshape CAD Associate
