

Pranet Patel

647-507-7308 | p2patel252@gmail.com | linkedin.com/in/pranet-patel | pranetpatel.vercel.app

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Next.js, React, Three.js, Framer Motion, Flask, Node.js

AI & ML: Prompt engineering, LLM integration (ChatGPT, Claude), PyTorch, OpenCV, ML pipeline development

AI Dev Tools: Claude Code, Cursor, GitHub Copilot, Vercel v0

Full Stack & DevOps: Docker, Git/GitHub, REST APIs, Vercel, PostgreSQL, MongoDB, Linux/Windows environments

Enterprise Systems: Business process automation, stakeholder communication, technical documentation

EXPERIENCE & PROJECTS

Product Builder

Apr 2026 – Aug 2026

GenieAI – Interactive 3D web experiences

runbos.ai | genieai.io

- Developed immersive 3D websites using Three.js, React, and Framer Motion for interactive user experiences
- Integrated pre-built AI agents into web applications, managing API hooks and backend connections
- Built performant web applications with Node.js backend and optimized 3D asset loading

Co-Founder & Technical Lead

Mar 2026 – Present

Ayvid Media – Digital transformation agency generating \$4K+ CAD monthly

ayvidmedia.com

- Built Next.js/React platform with TypeScript, deploying full stack application on Vercel with Docker
- Developed AI-powered quote system and live chat assistant using LLM integration and prompt engineering
- Leveraged Claude Code and Cursor for AI-assisted development, accelerating feature delivery by 40%

AI Engineer

Nov 2025 – Feb 2026

Nexa Technology Inc – AI-powered agricultural marketplace platform

Greater Toronto Area, ON

- Built AI pricing algorithm achieving 95% accuracy and chatbot with 90% customer satisfaction rate
- Defined backend requirements including data inputs, ML pipeline specifications, and model architecture
- Authored training prompts and reference solutions, applying prompt engineering for optimal LLM performance

Temple AI System

Jul 2025 – Nov 2025

Full-stack analytics platform with ML-powered recommendations

Python | Flask | React | Docker

- Built full stack web app with JavaScript/TypeScript frontend, Python Flask backend, and real-time analytics
- Developed QR-based check-in system with secure JWT authentication for data-driven operational insights
- Implemented on-device ML model using PyTorch, optimizing inference performance by 30% through quantization

Golf Simulator System

Dec 2025 – Apr 2026

Custom launch monitor with computer vision tracking

Python | OpenCV | Raspberry Pi

- Engineered golf simulator achieving 85% accuracy vs driving range using OpenCV for ball tracking
- Designed custom hardware with metal conduit framing, dual high-speed cameras, and IR floodlights
- Integrated Raspberry Pi for sensor fusion and low-latency data processing

Swim Instructor & Supervisor

Feb 2024 – Present

Super Swims LTD. – Aquatics instruction and facility operations

Brampton, ON

- Supervised team of 8+ instructors, managing scheduling, safety compliance, and daily operations
- Built OT Notes tool to process therapy notes and generate learning plans, saving supervisors 15 min/hour

EDUCATION

University of Western Ontario

Sept 2025 – Present

Bachelor of Engineering Science

London, ON

Ivey AEO Scholar, Scholarship of Distinction

CERTIFICATIONS

AWS Cloud Practitioner | Cisco – Introduction to Cybersecurity | IBM – AI Fundamentals | Onshape CAD Associate
